LibreOffice Migration Protocol

Reference Document

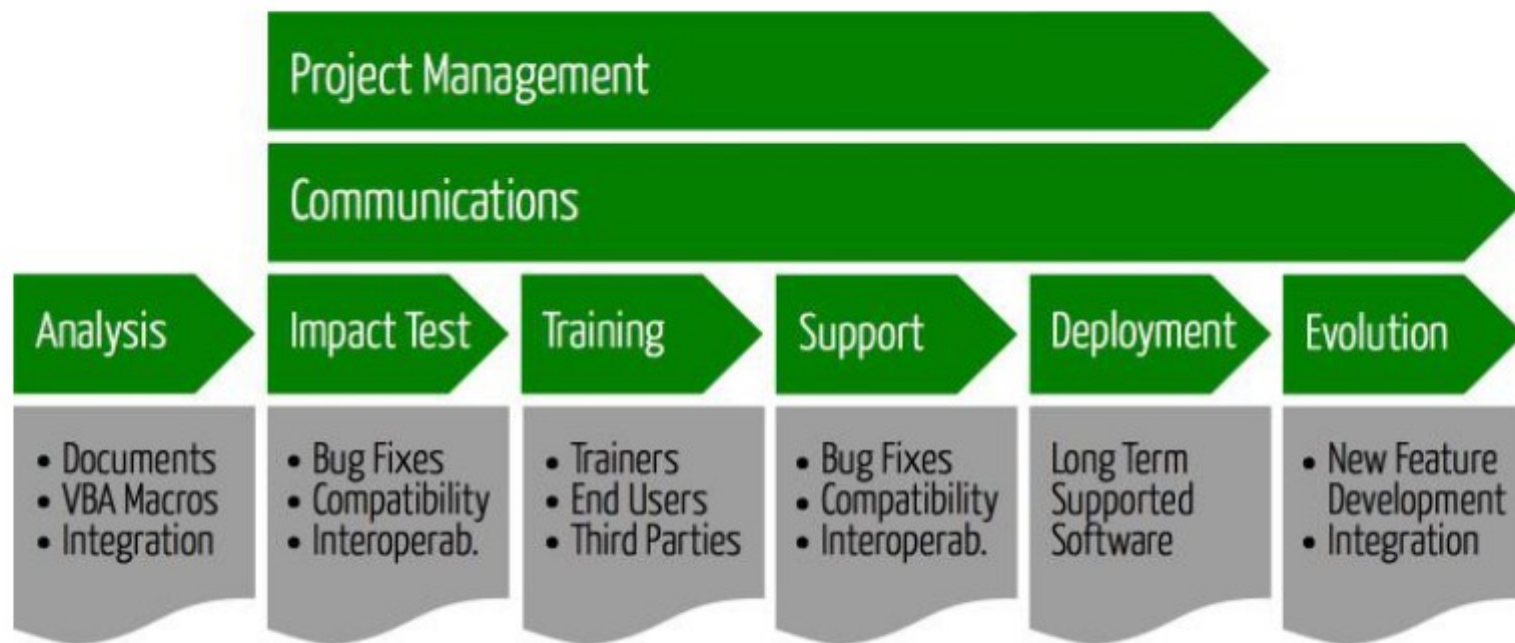

LIBREOFFICE MIGRATION PROTOCOL

LibreOffice

LibreOffice is the leading Free Software personal productivity suite for MS Windows, MacOS X and GNU/Linux, offering six feature-rich applications for all document production and data processing needs: Writer for text, Calc for spreadsheets, Impress for presentations, Draw for drawings, Base for databases, and Math for mathematical annotations. LibreOffice source code is dual licensed under LGPLv3/MPL copyleft licenses.

Migration, Step by Step

Communicating the change

In order to reduce the impact of resistance to change, it is important to start the migration project with a communication activity targeted to the entire organization (and not only to future users of LibreOffice). In fact, migrating to LibreOffice is a strategic move for the

The screenshot shows the LibreOffice website homepage. At the top left is the LibreOffice logo with the text 'LibreOffice from COLLABORA'. To the right is a call to action: 'CONTACT US TODAY LIBREOFFICE@COLLABORA.COM'. Below this is a navigation menu with links: HOME, PRODUCT, LEVEL 3 SUPPORT, TEAM, PARTNERS, CONSULTANCY, and CUSTOMER LOGIN. The main content area features a large image of a person using a laptop. The laptop screen displays icons for Windows, Linux (Tux), and Mac OS. Overlaid on the image is the text 'ENTERPRISE-READY on Windows, Linux & Mac' and a green button that says 'FIND OUT MORE'. Below the image is a row of five icons representing key features: Enterprise Ready (gears), Fully Supported (globe), 3 Year Long Term Support (calendar with '3'), Level 3 Bug Fixing Support (wrench), and Windows, Linux & Mac (laptop).

LEVEL 3 SUPPORT

Bugs are an intrinsic part of any software development (even the most costly proprietary software). The availability of contracted support, to address potential software code issues, is vital when considering the deployment of any program in a corporate environment. Collabora supports its build of LibreOffice at the Source Code level. As such we analyse, diagnose and solve issues at code level. Then deploy relevant patches and pass the fix to the community portal.

Collabora has a large team of certified LibreOffice developers, who are recognised for their depth of knowledge and their bug fixing capabilities. Over the years, we have provided the solution to many problems; regressions, simple application flaws and interoperability issues. Based on this experience, the company offers annually contracted Level 3 support packages. In special circumstances we can also offer one-off fixes against specific client issues.

PRICING

Bug-fix insurance / entitlements, with no-claims discounts if not used.

1. Single bug fixes, on-demand: US\$ 8,000 each.
2. Multiple bug fixes, pre-purchased in support packages.

ANNUALLY CONTRACTED LEVEL 3 (CODE ISSUES) SUPPORT PACKAGES

1 high & 2 medium severity*	\$15,000	€11,000	£10,000
2 high & 4 medium severity*	\$28,000	€20,000	£17,000
3 high & 6 medium severity*	\$40,000	€30,000	£25,000
